

## 1-phase solid state contactors for resistive loads

### Description

The RL Lite slimline series is the ideal solution when multiple solid state relays need to fit in a constrained space. The RL is intended for use with resistive loads.

The **RLC** variants are equipped with an integrated heatsink. The slimmest product, with a 17.8 mm wide footprint, has a rating of 22 AAC @ 40°C. The **RLC** range extends to 30 AAC, which occupies a 22.5 mm wide footprint.

Power terminals are touch protected and allow for easy and safe looping of cables. The removable IP20 covers allow wiring of ring lug terminated cables. The control is provided through a spring pluggable terminal.

The **RLC** output consists of a TRIAC that is protected against overvoltages by means of integrated protection. Control ON indication is provided through a green LED.

Specifications are at a surrounding temperature of 25°C unless otherwise specified.

### Benefits

- **Panel space savings.** The RL solid state contactor with a width of only 17.8 mm for ratings up to 22 AAC and 22.5 mm for ratings up to 30 AAC occupies a very small footprint in panels.
- **Trouble free operation over millions of cycles.** Wire bonding technology reduces thermal and mechanical stresses on the output chips resulting in a larger number of fault free operational cycles compared to other assembly technologies.
- **Low machine downtime.** Integrated overvoltage protection prevents the output of the solid state relay from breaking down in case of uncontrolled transients that may occur on the lines.
- **Ready to use.** The RLC is provided with an integrated heatsink, eliminating the need for users to calculate the size of the heatsink required for thermal dissipation and to maintain stock of heatsinks.
- **Touch safe.** The RL output terminals are touch protected. The touch protection cover is removable to allow connection of ring lug terminated cables.
- **Fast wiring.** Spring control terminals help to reduce installation time. The pluggable control terminals allow for fast and easy replacement.
- **Certifications ready.** The RLC conforms to applicable EU directives, UK regulations and is certified by Underwriters Laboratory as a listed product.

### Applications

Plastic injection machines, extrusion machines, blow moulding machines, thermoformers, dryers, electrical ovens, fryers, shrink tunnels, climatic chambers, ovens and furnaces, reflow ovens.

### Main features

- Voltage ratings up to 530 VAC
- Current ratings up to 22 AAC @  $T_A$  40°C in a 17.8 mm wide footprint, 30 AAC @  $T_A$  40°C in a 22.5 mm wide footprint
- DC or AC control voltage
- Integrated overvoltage protection

Description	Component code	Notes
Control plugs	RGM25	Pack of 10 spring loaded control plugs. 1x control plug is provided with the RL.

## Structure

Element	Component	Function
1/L1	Power connection	Mains connection
2/T1	Power connection	Load connection
A1+, A2-	Control connection	Terminals for control voltage
LED	ON indicator	Indicates presence of control voltage
Heatsink	Integrated heatsink	DIN rail mounting (panel mounting also possible)
PE	Protective Earth	Connection for Protective Earth, PE screw not provided with RLC

## Features

### General data

<b>Material</b>	PA66 or PA6 (UL94 V0), RAL7035 Glow wire ignition temperature and Glow wire flammability index conforming to EN 60335-1 requirements.	
<b>Mounting</b>	DIN rail (panel mount also possible)	
<b>Touch protection</b>	IP20	
<b>Overvoltage category</b>	III, 6 kV (1.2/50 $\mu$ s) rated impulse withstand voltage	
<b>Isolation</b>	Input and Output to Case:	4000 Vrms
	Input to Output:	4000 Vrms
<b>Weight (including packaging)</b>	RLC..15, RLC..22:	approx. 267 g
	RLC..30:	approx. 373 g

## Performance

### Output specifications

	RLC..15	RLC..22	RLC..30
<b>Max. operational current<sup>1</sup>: AC-51 @ Ta=25°C</b>	15 AAC	22 AAC	30 AAC
<b>Max. operational current<sup>1</sup>: AC-51 @ Ta=40°C</b>	15 AAC	22 AAC	30 AAC
<b>Operational frequency range</b>	45 to 65 Hz		
<b>Output protection</b>	Integrated overvoltage protection		
<b>Leakage current @ rated voltage</b>	<5 mAAC		
<b>Minimum operational current</b>	100 mAAC	150 mAAC	150 mAAC
<b>Repetitive overload current UL508: Ta=40°C, t<sub>ON</sub>=1 s, t<sub>OFF</sub>=9 s, 50 cycles</b>	22.5 AAC	33 AAC	45 AAC
<b>Non-repetitive surge current (I<sub>TSM</sub>), t=10 ms</b>	212 Ap	500 Ap	500 Ap
<b>I<sup>2</sup>t for fusing (t=10 ms), minimum</b>	225 A <sup>2</sup> s	1250 A <sup>2</sup> s	1250 A <sup>2</sup> s
<b>Power factor</b>	>0.9 at rated voltage		
<b>Critical dV/dt (@Tj init = 40°C)</b>	1000 V/ $\mu$ s

## Compatibility and conformance

<b>Approvals</b>	  
<b>Standards compliance</b>	LVD: EN 60947-4-3 / EE: BS EN 60947-4-3 EMCD: EN 60947-4-3 / EMC: BS EN 60947-4-3 UL: UL508, E80573, NRNT cUL: C22.2 No. 14, E80573, NRNT7

Electromagnetic compatibility (EMC) - Immunity	
<b>Electrostatic discharge (ESD)</b>	EN/IEC 61000-4-2 8 kV air discharge (PC2) 4 kV contact (PC1)
<b>Radiated radio frequency</b>	EN/IEC 61000-4-3 10 V/m, from 80 MHz to 1 GHz (PC1) 10 V/m, from 1.4 to 2 GHz (PC1) 10 V/m, from 2 to 2.7 GHz (PC1)
<b>Electrical fast transient (burst)</b>	EN/IEC 61000-4-4 Output: 2 kV, 5 kHz (PC2) Input: 1 kV, 5 kHz (PC1)
<b>Conducted radio frequency</b>	EN/IEC 61000-4-6 10 V/m, from 0.15 to 80 MHz (PC1)
<b>Electrical surge</b>	EN/IEC 61000-4-5 Output, line to line: 1 kV (PC2) Output, line to earth: 2 kV (PC2) Input, line to line, 1 kV (PC2) Input, line to earth, 2 kV (PC2)
<b>Voltage dips</b>	EN/IEC 61000-4-11 0% for 0.5, 1 cycle (PC2) 40% for 10 cycles (PC2) 70% for 25 cycles (PC2) 80% for 250 cycles (PC2)
<b>Voltage interruptions</b>	EN/IEC 61000-4-11 0% for 5000 ms (PC2)

Electromagnetic compatibility (EMC) - Emissions	
<b>Radio interference field emission (radiated)</b>	EN/IEC 55011 Class A: from 30 to 1000 MHz
<b>Radio interference voltage emissions (conducted)</b>	EN/IEC 55011 Class A: from 0.15 to 30 MHz (External filter may be required - refer to Filtering section)

### Notes:

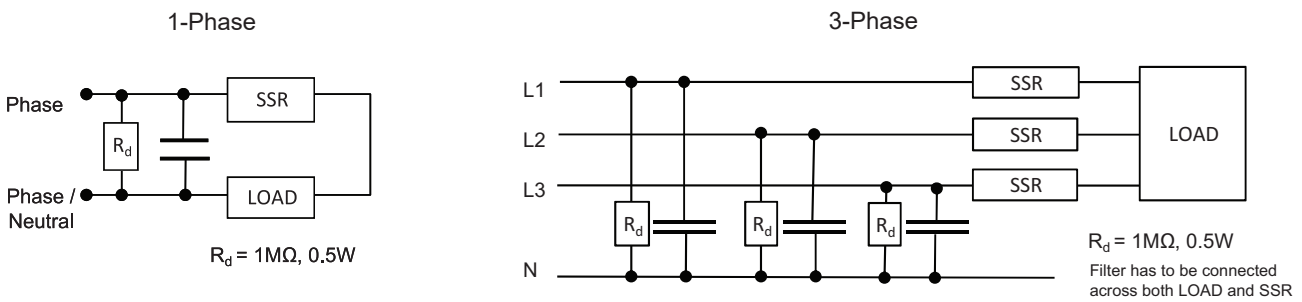

- Control input lines must be installed together to maintain products' susceptibility to Radio Frequency interference.
- Use of AC solid state relays may, according to the application and the load current, cause conducted radio interferences. Use of mains filters may be necessary for cases where the user must meet E.M.C requirements. The capacitor values given inside the filtering specification tables should be taken only as indications, the filter attenuation will depend on the final application.
- This product has been designed for Class A equipment. Use of this product in domestic environments may cause radio interference, in which case the user may be required to employ additional mitigation methods.
- Performance Criteria 1 (PC1): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (PC2): During the test, degradation of performance or partial loss of function is allowed. However when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (PC3): Temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.

**Filtering**

Part number	Suggested filter for EN 55011 Class A compliance	Maximum heater current [AAC]
RLC..15	68 nF / xx V / X1	15 AAC
RLC..22	220 nF / xx V / X1	22 AAC
RLC..30	220 nF / xxV / X1	30 AAC

xx represents the voltage rating of the capacitor. This shall not be lower than the mains supply voltage to which it will be connected.
